Summary

Web developer with a passion for building robust applications that are a joy to use. Very detail-oriented and possess strong experience in both front-end development with JavaScript, React.js, and CSS, and back-end development with Python and Django.

Experience

Full-Stack Software Developer

Waymark, Detroit, MI · July 2018 - Present

- Primarily work on the product team to build new features for the user-facing portion of the Waymark web app
- Work closely with designers to build clean, intuitive interfaces
- Completely rebuilt our site's video editing interface from scratch
- Implemented various techniques such as progressive image loading to improve load times
- Work heavily with JavaScript, React.js, Redux.js, and CSS on the front-end and Python and Django on the back-end

Software Engineer Co-op

Lenel, Pittsford, NY · January - August 2017

- Worked on the video team dealing with various web development tasks related to Lenel's Network Video Recorder product
- Built a prototype web app which could stream security camera feeds to browsers
- Primarily dealt with front-end and back-end web development using HTML/CSS, JavaScript, TypeScript, and Node.js
